The chart illustrates the price movement of Bitcoin over a 12-month period. The x-axis represents time in months, from January 2020 to January 2021. The y-axis represents the price in US dollars, ranging from \$0 to \$25,000. The 'Open' price is shown in blue, 'Close' in orange, 'High' in green, and 'Low' in red. The price starts at approximately \$10,000 in January 2020, peaks at about \$12,000 in March, and then drops to a low of around \$6,000 in April. It then shows a general upward trend with significant volatility, reaching over \$20,000 by January 2021.
